

**Exam MB-330 All Actual Questions(2025/10/23)**

Question #1

Topic 15

**Introductory Info**

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study -

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background -

Best for You Organics Company started as a home - based business. The founders began making handmade soaps and bath products in their kitchen. As sales increased, the business established a production facility and distribution center that supplies three retail stores.

Soaps and bath products are manufactured in the production facility and are stocked in the warehouse for distribution to the retail stores.

Employees at retail stores use mobile point of sale (MPOS) tablet devices to sell the products to customers.

The company structure is a single legal entity with two sites as shown in the diagram below:

Current environment -

Best for You Organics plans to introduce a new product line of face creams. Each product in the new line uses the same base ingredients but includes a different extract (for example, lime, avocado, kiwi). The marketing department is preparing to introduce the new product line. Minimal inventory will be held in the warehouse.

The company uses a cloud-based deployment of Dynamics 365 Supply Chain Management to manage finances for all company operations and locations. The company does not use Bill of Materials (BOM) versioning.

The production and warehouse facility is set up with the following organizational hierarchy:

User	Role
OpsManager	Operations manager
Employee1	Inventory control
StoreManager	Store manager
Employee2	Receiving clerk
Employee3	Shipping clerk
Employee4	Warehouse worker
Employee5	Production worker
Employee6	Store order clerk

External customers include:

CustomerA: a walk-in store customer (business-to-consumer)

CustomerB: a customer with an existing account (business-to-business)

External vendors include:

VendorA: a trucking company

VendorB: a raw materials supplier

Requirements. General -

The new product line must be set up in the system and readily available for sale when the company introduces the product line to the public at an upcoming trade show.

Requirements. Production -

You must configure the system to produce the new products:

Ensure that the warehouse stocks the minimum quantities of raw materials to produce the products.

Use a single version per item.

Implement FIFO inventory valuation methods.

Track raw and finished goods using different General ledger accounts.

Use a primary location to determine where to stock product in the warehouse.

Configure alternate locations in the warehouse to hold overstock products and refill the primary location as-needed.

Requirements. Shipments -

You identify the following requirements related to shipping:

Ship product to retail stores weekly.

Stores require a packing slip to check in merchandise. Drivers require transport documentation and charge per mile to the stores.

Shipments to Store1 must be scheduled for Monday, Wednesday, or Friday. Store1 will sometimes pick up their own deliveries when an order is small because they have their own van. Shipments to Store2 and Store3 must be scheduled for Tuesday or Thursday.

You must transmit Advance Shipping Notifications (ASN's) to the stores prior to deliveries

You must transmit Advance Shipping Notifications (ASNs) to the stores prior to deliveries.

Set up the system configuration to allow for store transfers.

Set up the system so that products may be shipped to the retail stores as bulk orders.

Set up the transport providers to deliver products from the warehouse to the retail stores.

Requirements. Reporting -

Once the new products are available in stores, review 30 days of historical sales data from day-to-day transactions will determine the reorder quantities.

Set up reporting to allow the product line to be costed and tracked independent of other items.

Requirements. Pricing and inventory

You identify the following requirements related to pricing and inventory:

Determine the quantity of the new products that can be produced and ready for sale within the first 90 days. Ensure that specialty packaging is on hand for retail sales. The packaging must be shipped directly to the stores from the vendor.

Stores must not inventory the packaging materials. Stores must maintain a 30-day supply of specialty packaging materials.

Stores must reorder packaging materials as needed.

Retail store customers must pay full retail price. Resellers must receive a 10 percent discount off the list price.

### Question

You need to set up financial components for the new items.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Assign items to a FIFO item model group. **Most Voted**

B. Assign the raw materials to a standard cost item model group. Assign finished goods to a FIFO item model group.

C. Create item model groups for raw materials and finished goods by using different ledger accounts. Assign items to these groups.

D. Assign raw materials to a standard cost item group. Assign finished goods to a FIFO item group.

E. Create item groups for raw materials and finished goods by using different ledger accounts. Assign items to these groups. **Most Voted**

**Correct Answer:** AE

*Community vote distribution*

AE (100%)

### Comments

**TPST** 8 months, 2 weeks ago

**Selected Answer:** AE

A for FIFO item model group. E for item group for define ledger account => A&E

Question #2

Topic 15

Employee1 needs to set up the new items for the product line.

Which two actions should Employee1 perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create new finished goods and release to the legal entity. Raw material products are not required for these items.
- B. Create new finished goods with predefined variants and release to the legal entity.
- C. Create new raw materials with variants and release to the legal entity.

D. Create new raw materials and release to the legal entity. **Most Voted**

E. Create new finished goods and release to the legal entity. **Most Voted**

**Correct Answer: DE**

**Selected Answer: DE**

There is not variant for what i saw in the description of the company.  
upvoted 5 times

**H\_Incandenza** 1 year, 10 months ago

I would disagree with that; I would say that what they described is a perfect fit for product variants. I would use a product dimension group with just configuration, and then make the configuration into the extract.

However, they expressly say "use a single version per item."

**IlseKH** Most Recent 10 months, 2 weeks ago

**Selected Answer: BD**

you can create a BOM per Product variant, but you dont need to make more versoins of it, the qute about the versions refert to the bom not the product

upvoted 1 times

**mondays** 1 year, 6 months ago

**Selected Answer: DE**

The product \*could\* be predefined variants, except production specifies "The company does not use Bill of Materials (BOM) versioning." - this would be required to manufacture product variants.

<https://learn.microsoft.com/en-us/dynamics365/supply-chain/production-control/bill-of-material-bom>

"To relate a specific BOM or formula to a product variant that can be produced, you must create a BOM version or formula version. "

Therefore D, E

**Jeddai** 1 year, 6 months ago

**Selected Answer: BD**

Agree with other comments.

upvoted 1 times

**Kev\_Sharp** 1 year, 6 months ago

**Selected Answer: BD**

B. Create new finished goods with predefined variants and release to the legal entity.

D. Create new raw materials and release to the legal entity.

Reason

"Each product in the new line uses the same base ingredients but includes a different extract (for example, lime, avocado, kiwi)"

this indicates product variant. Product variant is not to be confused with product version from this statement "Use a single

version per item.". Review the following for confirmation <https://learn.microsoft.com/en-us/dynamics365/supply-chain/pim/product-dimensions#version-dim>

upvoted 3 times

**globeearth** 5 months, 2 weeks ago

Agreed. it fits with product variants approach

upvoted 1 times

**TPST** 2 years ago

Best for You Organics plans to introduce a new product line of face creams. Each product in the new line uses the same base ingredients but includes a different extract (for example, lime, avocado, kiwi) => finished good should have variants so B and D

as for the Use a single version per item -> there's a product dimension called version, there is nothing to do with this sentence.

upvoted 2 times

**CCexamn** 2 years ago

Item model group = Defining costing principles, here FIFO (Answer A)

Item group = Defining ledger accounts, here different ledger accounts for RM and FG (Answer E).

Question #3

Topic 15

Employee1 must set up the new BOM.

Which three actions should Employee1 perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Create a new BOM for Store1, Store2, and Store3.

B. Activate the BOM. **Most Voted**

C. Add the raw materials to the BOM and approve the BOM version. **Most Voted**

D. Add the raw materials to the BOM and approve it.

E. Create a new BOM for Site1 only. **Most Voted**

**Correct Answer:** BCE

Reference:

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/production-control/bill-of-material-bom>

*Community vote distribution*

BCE (100%)

**Comments**

**Anthony\_D** **Highly Voted** 3 years, 11 months ago

I think it should be BDE, not BCE

The case says "The company does not use Bill of Materials (BOM) versioning"

And the source says "Note that a BOM version can be approved only if the related BOM itself is approved."

So it would not make sense to

- Approve the BOM version as the company does not use versioning

- Approve the BOM version but not the BOM

upvoted 6 times

**75a0975** **Most Recent** 11 months, 1 week ago

This is correct

upvoted 1 times

**Kev\_Sharp** 1 year, 6 months ago

**Selected Answer: BCE**

B. Activate the BOM
